

MASIRAH INTERNATIONAL

TECHNICAL & MARINE
SERVICES L.L.C

COMPANY PROFILE

ABOUT US

Masirah International Technical and Marine Services was established by Sultan Mohammed Al Humeidi and Jonathan Turner in October 1999.

Originally activities were limited to diving services in the Sultanate of Oman.

However, the company developed steadily and by 2005 offered a variety of marine related services both in Oman and elsewhere in the region.

In 2008, in partnership with Sarooj Construction L.L.C., Masirah International joined the Al Taher Group of companies adding considerable strength, experience and capabilities.

The company now operates a fleet of vessels and marine related plant which, combined with the experience of the staff, allows it to offer a great range of specialist marine services with confidence.

MESSAGE FROM THE DIRECTORS

We are most grateful to all those whose hard work and support has contributed to our success. We aim to further improve our capabilities as a marine contractor whilst maintaining the highest standards of operation.

SPECIALIST MARINE SERVICES

Though it is inevitable that our projects occasionally include non-marine related activities, the company is a firm believer in ***“doing what you're good at”*** and the majority of the specialist services offered remain marine related. Services provided include, but are not limited to, the following:

- | | |
|---|--------------------------------------|
| A - Marine plant hire | H - Diving services |
| B - Marine construction vessel charter | I - Technical diving services |
| C - Marine support equipment supply | J - Marine salvage |
| D - Marine construction | K - Diving equipment rental |
| E - Quay wall and breakwater construction | L - Marine installation |
| F - Marine piling and dredging | M - Geo physical services |
| G - Marine pipeline installation and maintenance | N - Marine maintenance |

A - MARINE PLANT HIRE

Masirah International own and operate a fleet of coastal vessels. All vessels meet the safety requirements for registration and operation in the region. In addition to the vessels, Masirah International has all the required support equipment, such as cranes and excavators, to allow us to execute marine projects of all sizes.

Ghumays II -self-propelled crane barge

Islander- multi-purpose vessel

Kumzar -250t capacity crane barge

Merlin-twin screw tug

Danah IV-self-propelled landing craft

Hud Hud- twin screw tug

B - MARINE CONSTRUCTION VESSEL CHARTER

Safa – 300t dumb barge

600t Split barge Thames

Cutter Suction Dredger Timsa

Road transportable jack-up platform

Clamshell pin barge Nimr

Charter of backhoe dredger

C - MARINE SUPPORT EQUIPMENT SUPPLY

Hyundai 290L-long reach excavator

Twin engine launches for dive support

Multi purpose modular pontoons

Long reach excavators with Dragflow dredge pump

CAT 385 long reach excavator

Linkbelt 150t crawler crane

D - MARINE CONSTRUCTION

Masirah International has the experience and resources to undertake all types of marine construction projects either on a sub-contract or turnkey basis.

The company has successfully completed major marine construction projects in the following fields:

1. Breakwater construction
2. Pipeline installation up to 2000mm diameter
3. Maintenance dredging
4. Piling
5. Block setting / quay construction

E - QUAY WALL, BREAKWATER AND HARBOUR CONSTRUCTION

Quay wall construction

Armour rock groyne

Completed quay wall

Coreloc sea defense

F - MARINE DREDGING AND PILING

Maintenance Dredging

Cutter suction dredging – harbor maintenance

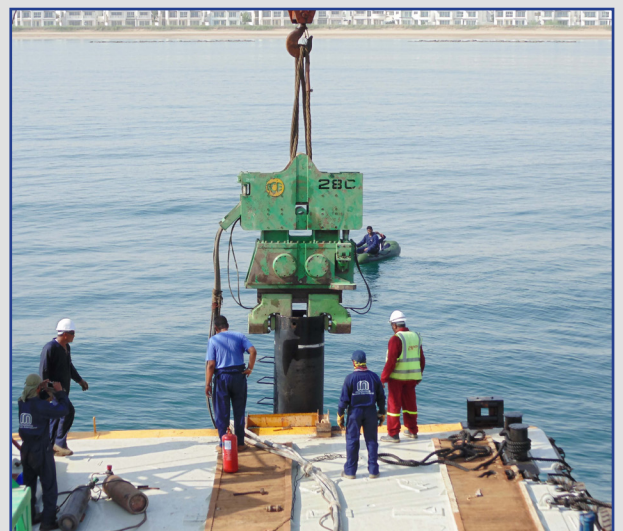

Maintenance Dredging

Tubular marine piling

Pre-drilling rock for pile installation

Marine piling

G - MARINE PIPELINE INSTALLATION AND MAINTENANCE

Installation of HDPE pipeline

Launching 1800mm HDPE pipe

Intake pipeline landfall

Airlifting intake basin

Divers installing concrete mattress

Intake pipe P.I.G

H - DIVING SERVICES

Masirah International can undertake any type of air diving operations, meeting Industry standards.

The company is approved for oilfield related dive operations by clients in Oman and internationally.

Masirah International operates four independent dive spreads, each complete with the latest surface supplied dive equipment and decompression facilities allowing us to operate simultaneous projects.

The company has a range of specialized underwater tools available and the full-time team of experienced divers are familiar with all equipment required by its clients.

Diving Services offered include the following:

- Underwater welding / cutting
- Inspection
- Underwater video and photography
- Restricted access diving
- High pressure underwater cleaning

Tending the diver

Diver on access ladder

Restricted access diving

I - TECHNICAL DIVING WORKS

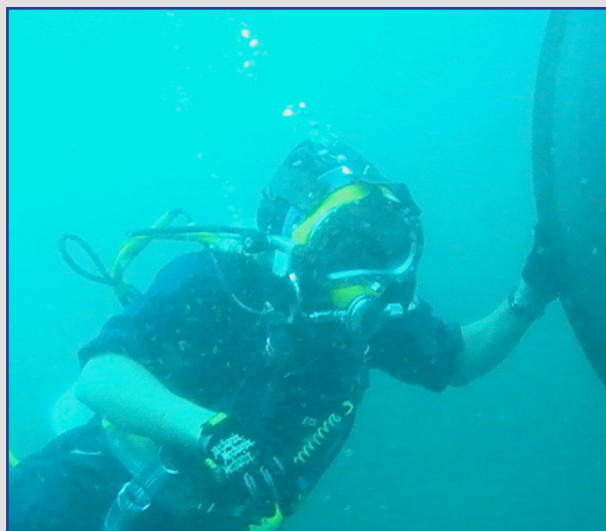

Underwater welding

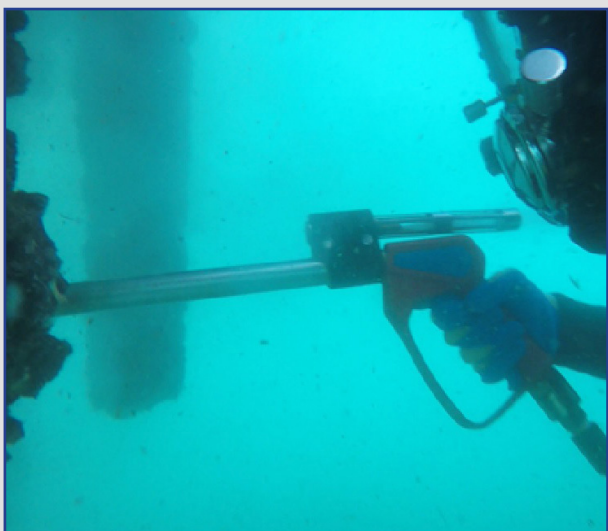

Underwater thermic lance

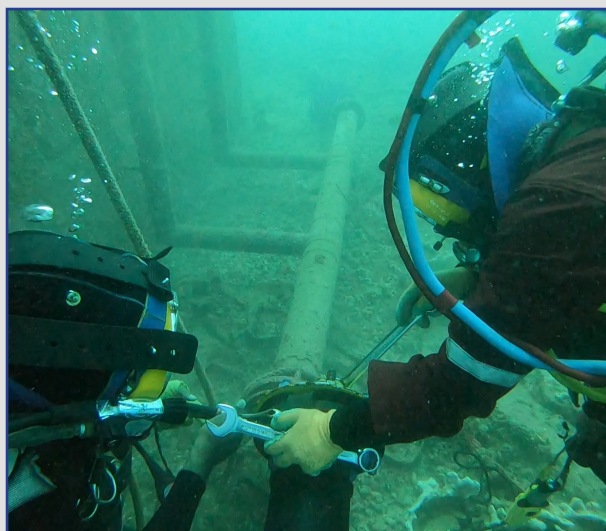

Underwater inspection on sea chest

In-house CSWIP divers

Cavitation blasting

Installation of hypo-chlorination system

J - SALVAGE

Vessel Salvage

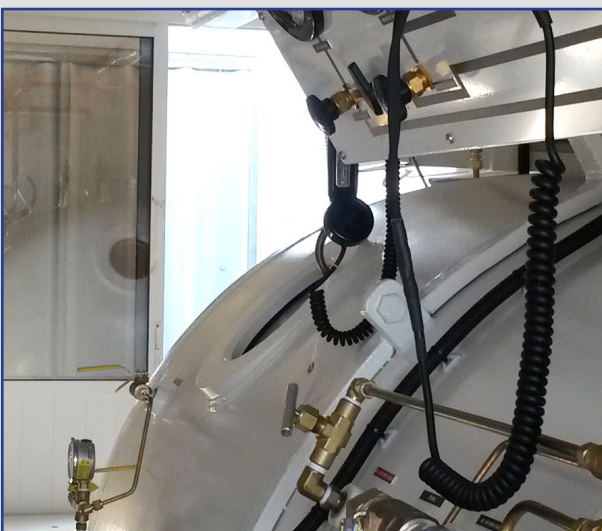

Successful Recovery

With a coastline of over 3000km and a history of maritime operations, it is inevitable that Masirah International are involved in marine salvage operations in Oman.

K - DIVING EQUIPMENT HIRE

All diving equipment meets the most stringent of industry standards and diving procedures meet both oilfield and construction diving codes of practice.

Decompression Chambers

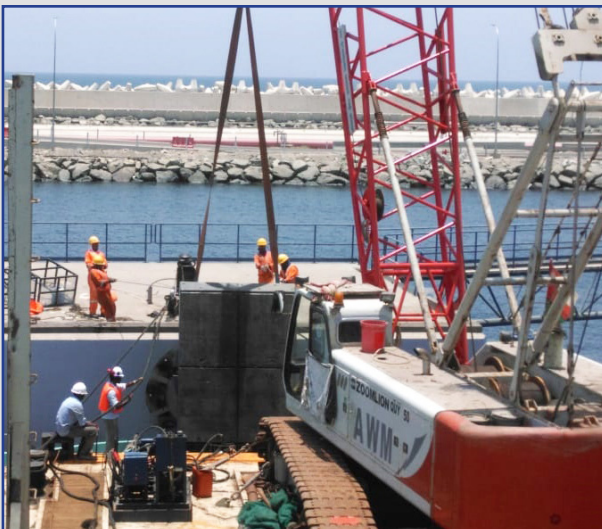

Dive Spreads

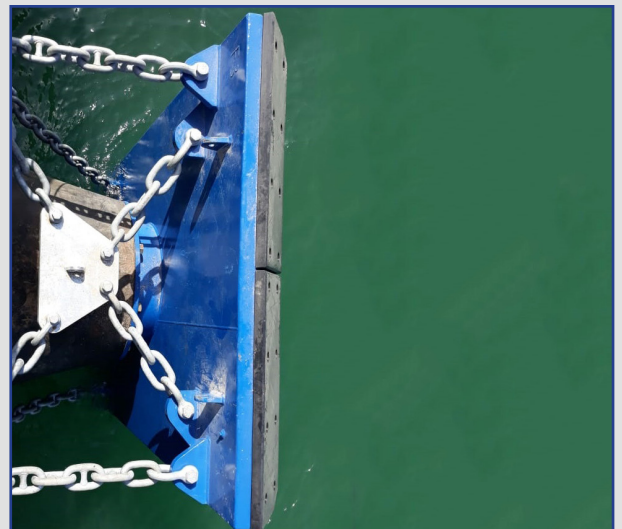

L - MARINE INSTALLATION FENDERS AND CABLE LAYING

Fender replacement

Fender installation

Quay wall fender

Cable installation land fall

Cable laying support from barge

L - MARINE INSTALLATION AQUACULTURE AND PONTOONS

A growing aqua-culture industry in Oman requires regular marine support

Anchor system installation

Fingerling deployment

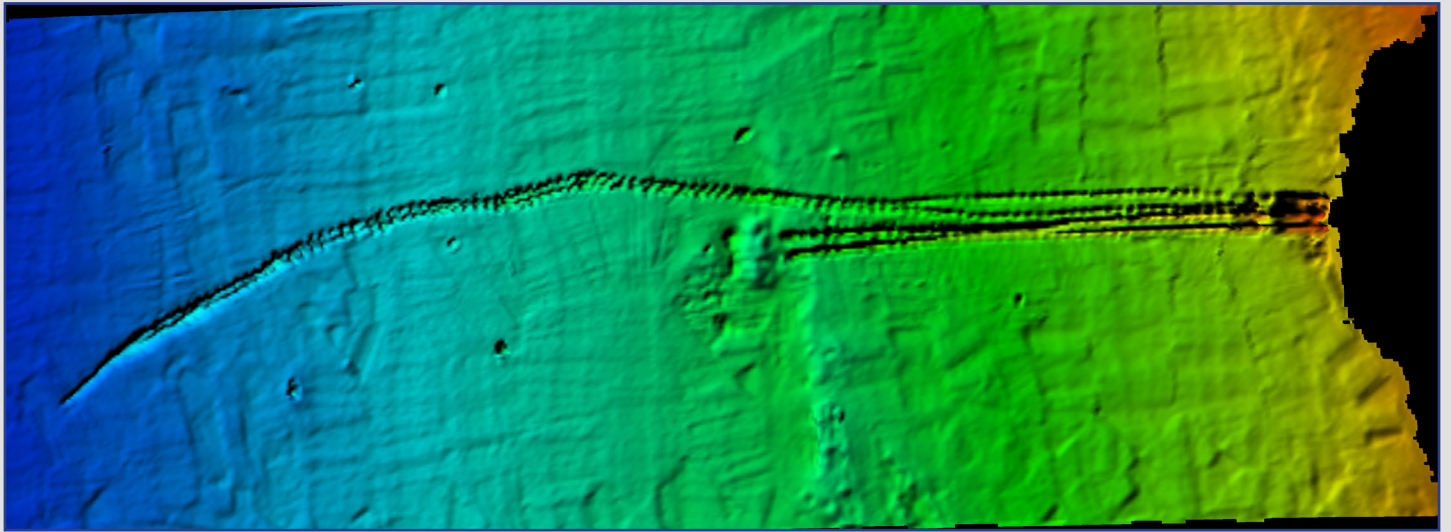

Steel pontoon fabrication and installation

Marina pontoon installation

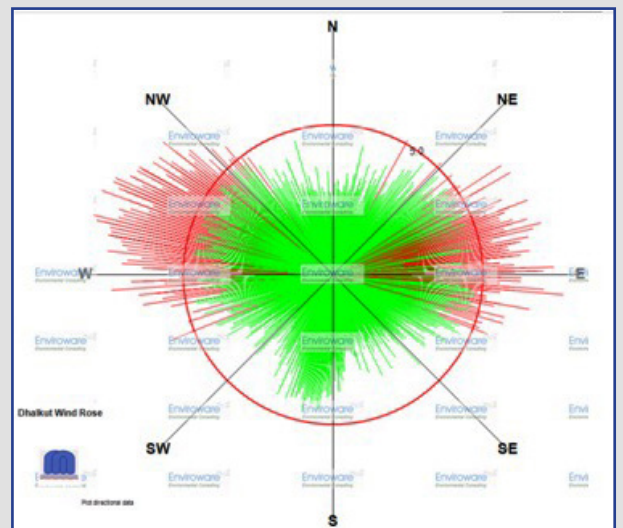

M - MARINE GEO-PHYSICAL WORKS

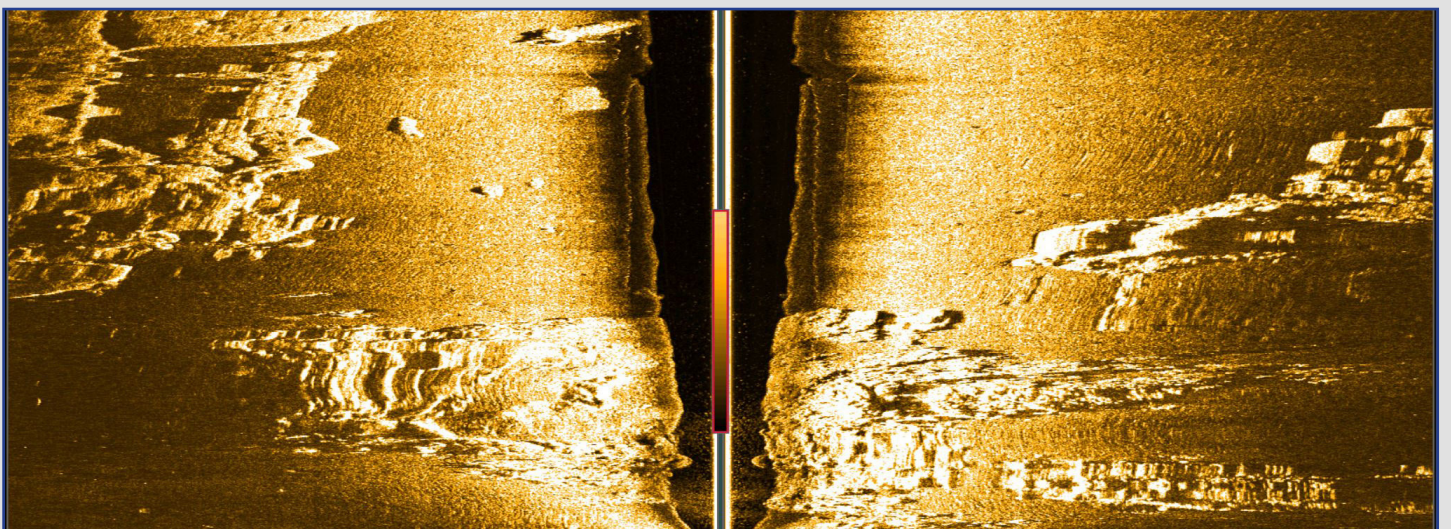

Multi-beam bathymetric survey

To complement other marine activities, and to prevent reliance on third party providers, Masirah International made the decision to invest in bathymetric survey equipment in 2008. With increasing demand and improved technology Masirah International now provides the full range of geo-physical marine services to its clients as well as government bodies including:

- Bathymetric survey (single and multi-beam)
- Sub bottom profiling
- Side scan sonar
- R.O.V works
- Water sampling
- Marine environmental survey

Wind-rose

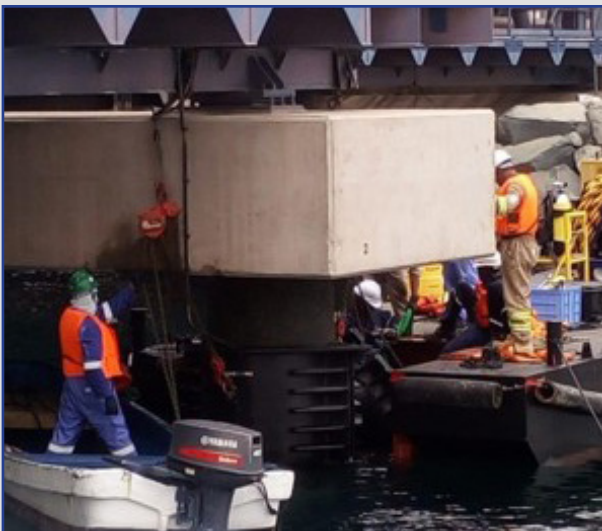

Side scan sonar imagery

N - MARINE MAINTENANCE

Established marine facilities in the region, such as refinery jetties, SBM export facilities, power stations and desalination plants require regular marine maintenance work and Masirah International is the leading provider of such services in Oman.

- SBM / SPM maintenance and support
- Jetty maintenance
- Pipeline maintenance (sewage and seawater intake and outfall)

Pile clamp installation

SPM repair

Hawser replacement

SPM maintenance

HSE AND CSR

Masirah International has always taken their responsibility for the environment and community very seriously.

Safety and the wellbeing of the staff, and those working together with them will always be the priority.

In a challenging work environment, it is essential that Masirah International keeps up with the latest and most demanding of HSE standards.

The company's QHSE regulations and Diving Code of Practice are enforced on all our Projects.
